Re: Pressure Fluctuations

The City of Kenedy is working diligently to repair a major water leak on the south end of town. Some residents may experience lower than normal water pressures. The water should NOT be shut down completely, but some residents especially at higher elevations may see lower than normal pressures. When the leak is repaired, all pressure will return to normal.

We thank you for your support and apologize for any inconvenience this may cause.

Respectfully,

Gary Paredes
Public Works Director
City of Kenedy
