**GENERAL INFORMATION:** Tax Code Section 26.04(c) requires an officer or employee designated by the governing body to calculate the no-new-revenue (NNR) tax rate and voter-approval tax rate for the taxing unit. These tax rates are expressed in dollars per \$100 of taxable value calculated. The calculation process starts after the chief appraiser delivers to the taxing unit the certified appraisal roll and the estimated values of properties under protest. The designated officer or employee shall certify that the officer or employee has accurately calculated the tax rates and used values shown for the certified appraisal roll or certified estimate. The officer or employee submits the rates to the governing body by Aug. 7 or as soon thereafter as practicable.

School districts do not use this form, but instead use Comptroller Form 50-859 *Tax Rate Calculation Worksheet, School District without Chapter 313 Agreements* or Comptroller Form 50-884 *Tax Rate Calculation Worksheet, School District with Chapter 313 Agreements*.

Water districts as defined under Water Code Section 49.001(1) do not use this form, but instead use Comptroller Form 50-858 *Water District Voter-Approval Tax Rate Worksheet for Low Tax Rate and Developing Districts* or Comptroller Form 50-860 *Developed Water District Voter-Approval Tax Rate Worksheet*.

The Comptroller's office provides this worksheet to assist taxing units in determining tax rates. The information provided in this worksheet is offered as technical assistance and not legal advice. Taxing units should consult legal counsel for interpretations of law regarding tax rate preparation and adoption.

### SECTION 1: No-New-Revenue Tax Rate

The NNR tax rate enables the public to evaluate the relationship between taxes for the prior year and for the current year based on a tax rate that would produce the same amount of taxes (no new taxes) if applied to the same properties that are taxed in both years. When appraisal values increase, the NNR tax rate should decrease.

The NNR tax rate for a county is the sum of the NNR tax rates calculated for each type of tax the county levies.

While uncommon, it is possible for a taxing unit to provide an exemption for only maintenance and operations taxes. In this case, the taxing unit will need to calculate the NNR tax rate separately for the maintenance and operations tax and the debt tax, then add the two components together.

**SECTION 2: Voter-Approval Tax Rate**

The voter-approval tax rate is the highest tax rate that a taxing unit may adopt without holding an election to seek voter approval of the rate. The voter-approval tax rate is split into two separate rates:

- Maintenance and Operations (M&O) Tax Rate:** The M&O portion is the tax rate that is needed to raise the same amount of taxes that the taxing unit levied in the prior year plus the applicable percentage allowed by law. This rate accounts for such things as salaries, utilities and day-to-day operations.
- Debt Rate:** The debt rate includes the debt service necessary to pay the taxing unit's debt payments in the coming year. This rate accounts for principal and interest on bonds and other debt secured by property tax revenue.

The voter-approval tax rate for a county is the sum of the voter-approval tax rates calculated for each type of tax the county levies. In most cases the voter-approval tax rate exceeds the no-new-revenue tax rate, but occasionally decreases in a taxing unit's debt service will cause the NNR tax rate to be higher than the voter-approval tax rate.

- a tax year in which the municipality is a defunding municipality, as defined by Tax Code Section 26.0501(a);<sup>41</sup> or

**SECTION 7: Voter-Approval Tax Rate Adjustment for Emergency Revenue Rate**

In the tax year after the end of the disaster calculation time period detailed in Tax Code Section 26.042(a), a taxing unit that calculated its voter-approval tax rate in the manner provided for a special taxing unit due to a disaster must calculate its emergency revenue rate and reduce its voter-approval tax rate for that year.<sup>46</sup>

Similarly, if a taxing unit adopted a tax rate that exceeded its voter-approval tax rate, calculated normally, without holding an election to respond to a disaster, as allowed by Tax Code Section 26.042(d), in the prior year, it must also reduce its voter-approval tax rate for the current tax year.<sup>47</sup>

This section will apply to a taxing unit other than a special taxing unit that:

- directed the designated officer or employee to calculate the voter-approval tax rate of the taxing unit in the manner provided for a special taxing unit in the prior year; and
- the current year is the first tax year in which the total taxable value of property taxable by the taxing unit as shown on the appraisal roll for the taxing unit submitted by the assessor for the taxing unit to the governing body exceeds the total taxable value of property taxable by the taxing unit on January 1 of the tax year in which the disaster occurred or the disaster occurred four years ago.

This section will apply to a taxing unit in a disaster area that adopted a tax rate greater than its voter-approval tax rate without holding an election in the prior year.

Note: This section does not apply if a taxing unit is continuing to calculate its voter-approval tax rate in the manner provided for a special taxing unit because it is still within the disaster calculation time period detailed in Tax Code Section 26.042(a) because it has not met the conditions in Tax Code Section 26.042(a)(1) or (2).

# Unused Increment Rate

(not applicable to school districts)

## Unused Increment Rate

The unused increment rate can be used to increase the voter-approval tax rate, depending upon the tax rates adopted by a city in the previous three years. The unused increment rate is the three year rolling sum of the difference between the actual tax rate and the voter-approval tax rate. A city has the ability to bank any unused amounts below the voter-approval tax rate to use up to three years. Conversely, if a city adopts the voter-approval tax rate all three years, the unused increment rate would be zero. School districts do not calculate an unused increment rate.

### UNUSED INCREMENT RATE

## Maximum Unused Increment Rate – Three Year Look Back Calculation

Taxing units calculate the unused increment rate by comparing the actual tax rates in the previous three-years to the voter-approval tax rate, the maximum tax rate a unit can adopt without triggering an election. This comparison is made before considering the unused increment allowance in the voter-approval tax rate.

The unused increment for any year prior to 2020 is considered zero.

If a municipality is considered a defunding municipality, the difference between the municipality's actual tax rate and the voter-approval tax rate is considered zero.

Counties that reduce the funding or allocate funding away from a law enforcement agency without voter approval, the difference between the actual tax rate and the voter-approval tax rate is considered zero.

## Frequently Asked Questions

### How do I calculate my taxing unit's unused increment rate?

---

The unused increment rate looks back at the difference between the taxing unit's voter-approval tax rate without the unused increment and the adopted tax rate for each of the preceding three years. This process is commonly referred to as "banking" unused pennies by adopting a tax rate below the allowable revenue growth of 3.5 percent. Depending on the tax rate adopted each year, the taxing unit may contribute to or withdraw from the banked pennies. The formula for the unused increment rate is the following: (previous year voter-approval tax rate without the unused increment rate – previous year actual tax rate) + (2nd preceding year voter-approval tax rate without the unused increment rate – 2nd preceding year actual tax rate) + (3rd preceding year voter-approval tax rate without the unused increment rate – 3rd preceding year actual tax rate) = the current year's total unused increment rate.

### What happens if my taxing unit adopts a tax rate that uses some or all the available unused increment rate for the current year?

---

If a taxing unit adopts a tax rate that uses some or all the available unused increment rate, that taxing unit will effectively "withdraw" that portion or all the unused increment. By adopting a tax rate below its voter-approval tax rate but greater than what the voter-approval tax rate would have been without the unused increment, the formula would result in a negative contribution or draw down for that individual year of the total three-year look back. Over the next three years, the current year will contribute a negative number to the unused increment calculation, effectively lowering or zeroing out the total unused increment rate in future years.

### Do we have to use all the available unused increment rate when calculating this year's voter-approval rate?

---

Your voter-approval tax rate calculation must include the entire unused increment rate, however, the taxing unit does not have to adopt a tax rate that uses any of the

unused increment rate or "banked" pennies. The unused increment rate available for the current year depends upon the amount of unused increment in each of the previous three years. If a portion of unused increment was used in the previous three years, only the portion that is unused rolls to the next year.

### Are there posting or publishing requirements for the unused increment rate?

---

Yes, the unused increment rate is calculated within the Tax Rate Calculation Worksheet and the worksheet must be published. However, there is no specific requirement that a notice of tax rate, hearing or meeting must separately identify the unused increment rate.

### Is an election to approve the adopted tax rate triggered if the adopted tax rate is less than the voter-approval tax rate with the unused increment rate added?

---

No, the voter-approval tax rate is inclusive of any available unused increment rate and is now the highest tax rate a taxing unit may adopt before an automatic election is triggered.

### What happens to the unused increment rate if we do not use it?

---

The unused increment rate looks at the previous 3 years. If a taxing unit adopts a tax rate equal to what its voter-approval tax rate would have been without the addition of the unused increment rate, it will not contribute any "banked" pennies to the unused increment rate for that year within the calculation for the next three years. The unused pennies from the two preceding years will still be available within the calculation in the next immediate year.
